

LELAND STANFORD JUNIOR UNIVERSITY

DEPARTMENT OF BOTANY

*Stanford University, Cal.,*  
March 13, 1923

Dear Professor Munz,

I regret to report that we have no specimens of Parish's *Nolina* referred to ~~you~~ by you. Some of his specimens ~~he~~ reports were destroyed by insects and discarded several years ago. Whether the *Nolina* was among them I do not know.

We are putting aside some good material for you, and will send it on sometime this spring. There are a considerable number of duplicates in my collections, but we cannot send these out until we have finished checking them up with the mounted collections.

Do you know of any publisher in southern California who would or might be interested in the Los Angeles Flora? I have only a few copies left, and it will have to be reprinted this fall. ~~if~~

Yours respectfully,

*L. P. Abraham*
